Software Architecture & Design • Web Applications • Efficient & Cost effective Team Software Development and Testing • Global Application Deployment • Critical Project Management • Code Reviews • Leveraged Software Development • Client Relations Management • Resource Allocation

Professional Experience

Ernst & Young LLP, Dallas, Texas

2004 to Present

Assistant Director

Managed development teams using ASP.Net, VB.Net, C#, Visual Studio Team System, SQL Server, SQL Reporting Services, OLAP and Ajax Technology supporting the global finance and the human resource operations.

- Implemented core global software and server architecture which enabled efficient software development, reducing the time to market and overall development and testing cost.
- Global solutions include online document management, file sharing, workflow management with multiple workflow application implementations, scorecards and key statistics reporting and Expense Audit. The implementation of these solutions allowed for the global deployment of the financial transaction processing for the firm, reducing cost and contributed to a global firm financial model.
- Worked with customers and resources in India, Australia, China, Singapore and the United States to achieve a high availability, global application suite used for the daily financial activity of the firm.

Financial Computer Software, Dallas, Texas

2000 to 2004

Senior Software Developer

Designed and developed accounting and compliance software for use as part of a commercial loan portfolio management software suite.

- Designed complex reports and financial calculations including price, yield, convexity and duration on odd term bonds.
- Used my accounting background to create a solution which would interface the loan software to the clients accounting system.

Thompson RIA, Dallas, Texas

1999 to 2000

Senior Software Developer

Designed and developed a corporate tax planning solution including tools to allow accountants to create tax plans which take into account tax law changes or business changes.

- Created an algorithm for efficiently handling carry forwards and carry back calculations
- Developed client/server applications using Visual Basic 6, SQL 7, MS OLAP and XML
- Developed Web Based applications using DHTML, JavaScript, VBScript, XML, Visual Basic and ASP

CCH Publishing, Wichita, Kansas

1996 to 1999

Software Developer

Developed and supported professional individual tax compliance software.

- Evaluated Internet technology using Interdev, Java, JavaScript and ASP.
- Presented job requirements to prospective new hires

Baird, Kurtz & Dobson, CPA's, Wichita, Kansas

1995 to 1996

Staff Accountant

Audited client's financial statements. Prepared tax returns for individuals, partnerships, corporations and charitable organizations.

- Developed a spreadsheet add-in to assist in the tax compliance of consolidated corporations

Koch Industries, Wichita, Kansas

1994 to 1995

Accountant

Accounting for cash management and municipal lease obligation portfolio and securitization

- Developed an Access database to track the municipal lease portfolio which allowed a more precise recognition of income and financial analysis.
